To Whom It May Concern:

I want to take this opportunity to express our extreme happiness with our brand new American Cancer Society office in Perrysburg, built-in by Accessible Renovations. Our staff was awed by the build-in; combining two offices was a stressful time, but after seeing our new facility, everyone could not wait to get settled! The offices are laid out expertly and Accessible Renovations has provided us with an amazing work environment.

During the first few weeks in our new location, many of our volunteers stopped by to see the new office. They were thrilled! It was obvious to all of our volunteers that this new facility will allow the American Cancer Society staff the ability to do so much more! There is also a great deal more storage room, which will allow us to keep more supplies, literature, and tools on hand.

We met with our Board of Directors from four different counties (Lucas, Wood, Sandusky, and Ottawa) in the new office and the members were just delighted with the job that Accessible Renovations had done. Because of the company's keen sense of understanding of what the American Cancer Society needed for its office, we were able to move in to a facility that is perfect for our needs.

I am so pleased with the work of Accessible Renovations, headed by Matthew Lee. The crew was respectful and hard-working and I highly recommend them for any job that may be in your future.

Sincerely,

A handwritten signature in black ink that reads "Anita Dunipace".

Anita Dunipace
Northwest Ohio Regional Vice-President
American Cancer Society
